

Amendments to the Drawings

The attached 3 sheets of drawings include new FIG. 4 on sheet 3/3. The replacement sheets have been renumbered as 1/3 and 2/3, and the new sheet as 3/3 respectively.

Attachment: Replacement Drawings

Remarks/Arguments

Claims 1-19 are pending and allowable if various objections are overcome. In view of the amendments noted above and comments below, Applicant believes the objections have been overcome and thus respectfully requests that the Examiner reconsider the present application including claims 1-19 and withdraw the objection to the drawings, specification and claims.

a) The drawings are objected to for not showing every feature of the invention specified in the claims and the Examiner indicates that FIG. 1 should be labeled as –PRIOR ART--.

Applicant has added new FIG. 4 to provide express and literal support for claims 17 – 19. Applicant does not believe that FIG. 1 should be labeled as –PRIOR ART—since that figure shows or supports the processing in accordance with the discussion of FIG. 2 and does not necessarily represent prior art. Applicant respectfully requests that the Examiner reconsider and withdraw the objection to FIG. 1.

Applicant in view of the changes to the figures and comments above, respectfully submits that the figures are now proper and thus requests that the Examiner reconsider and withdraw this objection to the figures.

b) The specification is objected to for various informalities in the specification and abstract.

(1) A replacement ABSTRACT is enclosed that overcomes the Examiner's concerns.

The replacement ABSTRACT has changed "CDMA" in line 1 to "Code Division Multiple Access (CDMA)" and "DLL" in line 11 to "Delay Locked Loop (DLL)".

(2) Amendments to the specification as requested by the Examiner have been proposed as noted above. Specifically:

at page 1, line 13 "CDMA" is changed to "Code Division Multiple Access (CDMA)";
at page 2, line 7 "DSP" is changed to "Digital Signal Processor (DSP)";
at page 4, line 15 "I/O" is changed to "Input/Output (I/O)" and
at page 9, line 19 "ASIC" is suggested to be changed to "Application-Specific Integrated Circuit (ASIC)".

Thus Applicant respectfully submits that this objection to the specification has been overcome and requests that the Examiner reconsider and withdraw this objection.

c) Claim 3 is objected to because of informalities.

Applicant has amended claim 3 as noted above, in accordance with the Examiner's request (specifically "ASIC" is changed to "Application-Specific Integrated Circuit (ASIC)") and thus it is believed that the objection has been traversed and should be withdrawn.

Accordingly, Applicant respectfully submits that the application including claims, as amended, clearly and patentably distinguish over the cited reference of record and as such are to be deemed allowable. Such allowance is hereby earnestly and respectfully solicited at an early date. If the Examiner has any suggestions or comments or questions, calls are welcomed at the phone number below.

Although it is not anticipated that any fees are due or payable since this Ex-parte Quayle amendment and response is being timely filed within 2 months of the April 1, 2005 Office Action, the Commissioner is hereby authorized to charge any fees that may be required to Deposit Account No. **50-3435**.

Respectfully submitted,

Charles W. Bethards
